

### What is a Smart Contract?

A **smart contract** is a <u>computer program</u> or a <u>transaction protocol</u> that is intended to automatically execute, control, or document legally relevant events and actions according to the terms of a <u>contract</u> or an agreement. The objectives of smart contracts are the reduction of need for trusted intermediators, arbitrations, and enforcement costs, fraud losses, as well as the reduction of malicious and accidental exceptions.

<u>Vending machines</u> are mentioned as the oldest piece of technology equivalent to smart contract implementation. 2014's <u>white paper</u> about the <u>cryptocurrency</u> <u>Ethereum<sup>[6]</sup></u> describes the <u>Bitcoin protocol</u> as a weak version of the smart contract concept as defined by computer scientist, lawyer, and cryptographer <u>Nick Szabo</u>. Since Ethereum, various cryptocurrencies support scripting languages which allow for more advanced smart contracts between untrusted parties. Smart contracts should be distinguished from <u>smart legal contracts</u>. The latter refers to a traditional natural language legally-binding agreement that has certain terms expressed and implemented in machine-readable code.

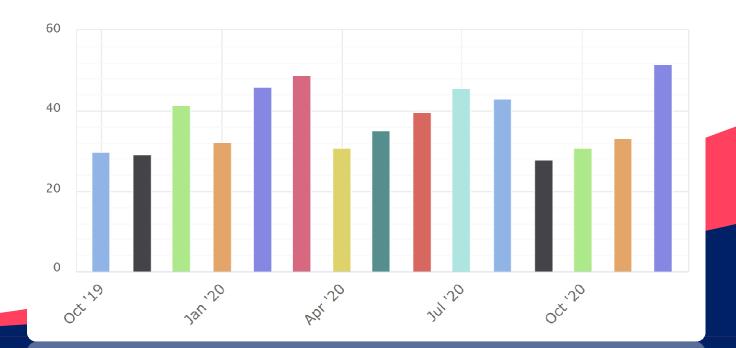

# Key Features of TRONtiply

- Earn 200% on your Investment
- Get upto 1.40% Profit everyday
- Stable & Real Profits generated By Forex trading
- Our Forex Trading career:

Forex is the world's biggest market where 6 Trillion dollars are traded daily. Forex has a big exposure to making good money, but the downside of this is 90% of the people who trade in the Forex market lose money. We have been trading in the Forex market for the last 4 years. We have been consistent in generating good profits under a very controlled drawdown. For the last 1 & half years, we are consistently monitoring our monthly returns under a 20% drawdown. Here in the chart, you can see how we manage to make 40% profit every month throughout this time.

- No More Ponzi Contracts where most of the people end up losing their money
- Weekly Trading Reports for 100%transparency
- Massive Binary Commissions for Leaders & Team builders

### WEEKLY TRADINGREPORTS

To make things 100% transparent, we will publish our weekly profit reports every week. Every week a trading video is published in which all the profit that was made in the last week is being shown live and withdrawn. We will also cover the live deposit of the profit to the contract in the same video.

#### Why Blockchain-based MLM?

MLM stands for multi-level marketing and TRONtiply is the first blockchain-based MLM with unique features that have never been seen before. In most of the MLM, transparency is the key issue where most of the companies do not show much transparency and just work on money rotation, while in TRONtiply everyone can track all the transactions on TRON blockchain and see all the details anytime they want. Another thing is the generation of profit while we publish weekly trading reports and deposit profits into the contract so everyone can go to our contract and check how much profit is deposited back to the contract. Another issue most common issue with the centralized MLM companies is whether they get shut down by institutions or face some kind of legal issues. While we are a decentralized company, so we will never face these kinds of issues.

Most recent MLM company MTI has been screwed by FSCA of South Africa just because they were centralized and banks and government can put them in trouble. While we are 100% decentralized, we will never face such issues.
